

### Program Overview

A 3-year medical school curriculum was derived from the current 4-year curriculum (*Lead.Serve.Inspire*), and offered to those students who declare, at the time of application, an interest in pursuing family medicine as a career. *The goal of this parallel track is to increase the number of practicing family medicine physicians (ideally in the State of Ohio) to address the predicted (and existing) shortfall of primary care and family physicians facing our state and the nation.* Upon successful completion the students will be accepted in the OSU Family Medicine Residency Program.

### PCT Program Costs and Financial Aid

Students receive a tuition scholarship covering 50% of in-state tuition in all 3 years

### PCT Student Support

- Peer tutoring through first two years
- Family Medicine faculty leading PCT student small group sessions and portfolio coaching
- Networking and enrichment activities with family medicine interest group and family medicine residency program

### Program Curriculum

3-Year Primary Care Track (PCT) Curriculum						
	Summer	Fall			Spring	
Year 1	Scribe Training	Orientation	Foundations 1	Foundations 2	Bone and Muscle	Cardio-pulmonary
			Longitudinal Group			
Family Medicine Ambulatory Clinical Experiences (ACE)						
Year 2	Host Defense	GI/Renal	Endo/Repro	Step 1 Board Prep	Ring 1, "clerkships"	
		Longitudinal Group				
Family Medicine Ambulatory Clinical Experiences (ACE)						
Year 3	Ring 2, "clerkships"	Ring 3, "clerkships"		Step 2 Board Prep	AMRCC	AMHBC
	Family Medicine Ambulatory Clinical Experiences (ACE)					

#### Year 1

- 3- week summer orientation including online Scribe Training, clinical skills and OSCEs.
- Longitudinal Group (small group) sessions held with other primary care interested medical students
- Longitudinal Ambulatory Clinical rotations begin during the students first week at a Family Medicine site with Family Medicine Preceptors

#### Year 2

- Host Defense block held over the summer with the MD/PhD students
- Step 1 Board Prep for 6 weeks prior to taking the boards
- After taking Step 1 students enter Part 2 or the typical year 3 of the curriculum a full semester ahead of their peers

#### Year 3

- Elective and flex time limited in year 3 to allow students to complete only the required fourth year courses
- The Family Medicine clerkship rotation is a longitudinal experience.

### Program Status & Accomplishments

- Admission process completed with 23 applicants, 16 interviews
- 2 students started in the initial cohort in July 2017
- Goal of 4 students in each cohort for the next 4 years
- Maximum number of students in the program at one time is 12
- First graduates expected in May 2020

### Advice for Other Institutions

- Interview process through the medical school process with additional resident interviews.
- Acclimating PCT students with the residency program through the interview process, teambuilding and networking events on campus, and regular didactic sessions, is important for student development
- Having the additional layer of support from family medicine program directors, program faculty and coordinator is helpful for student support
- Dedicated Program Coordinator for logistics and continuity
- Some experiences should still be completed with the student's cohort in the first and second year in order for students to remain connected with their medical school class
- 3 curricular components were integrated in a longitudinal course entitled Ambulatory Clinical Experiences. This allows for completion in three years with a common thread through medical school and into residency.
